STEP 1 ! ! ! In first using or re-work after power off. Pls do reset operation.

This is the force point. Use this to transfer the BASE.

At the lowest altitude, press and hold the down button "↓". After about 5 seconds, the system enters initialization mode until the display reads 70.0 altitude. Then press the "↑" key to raise the desktop.

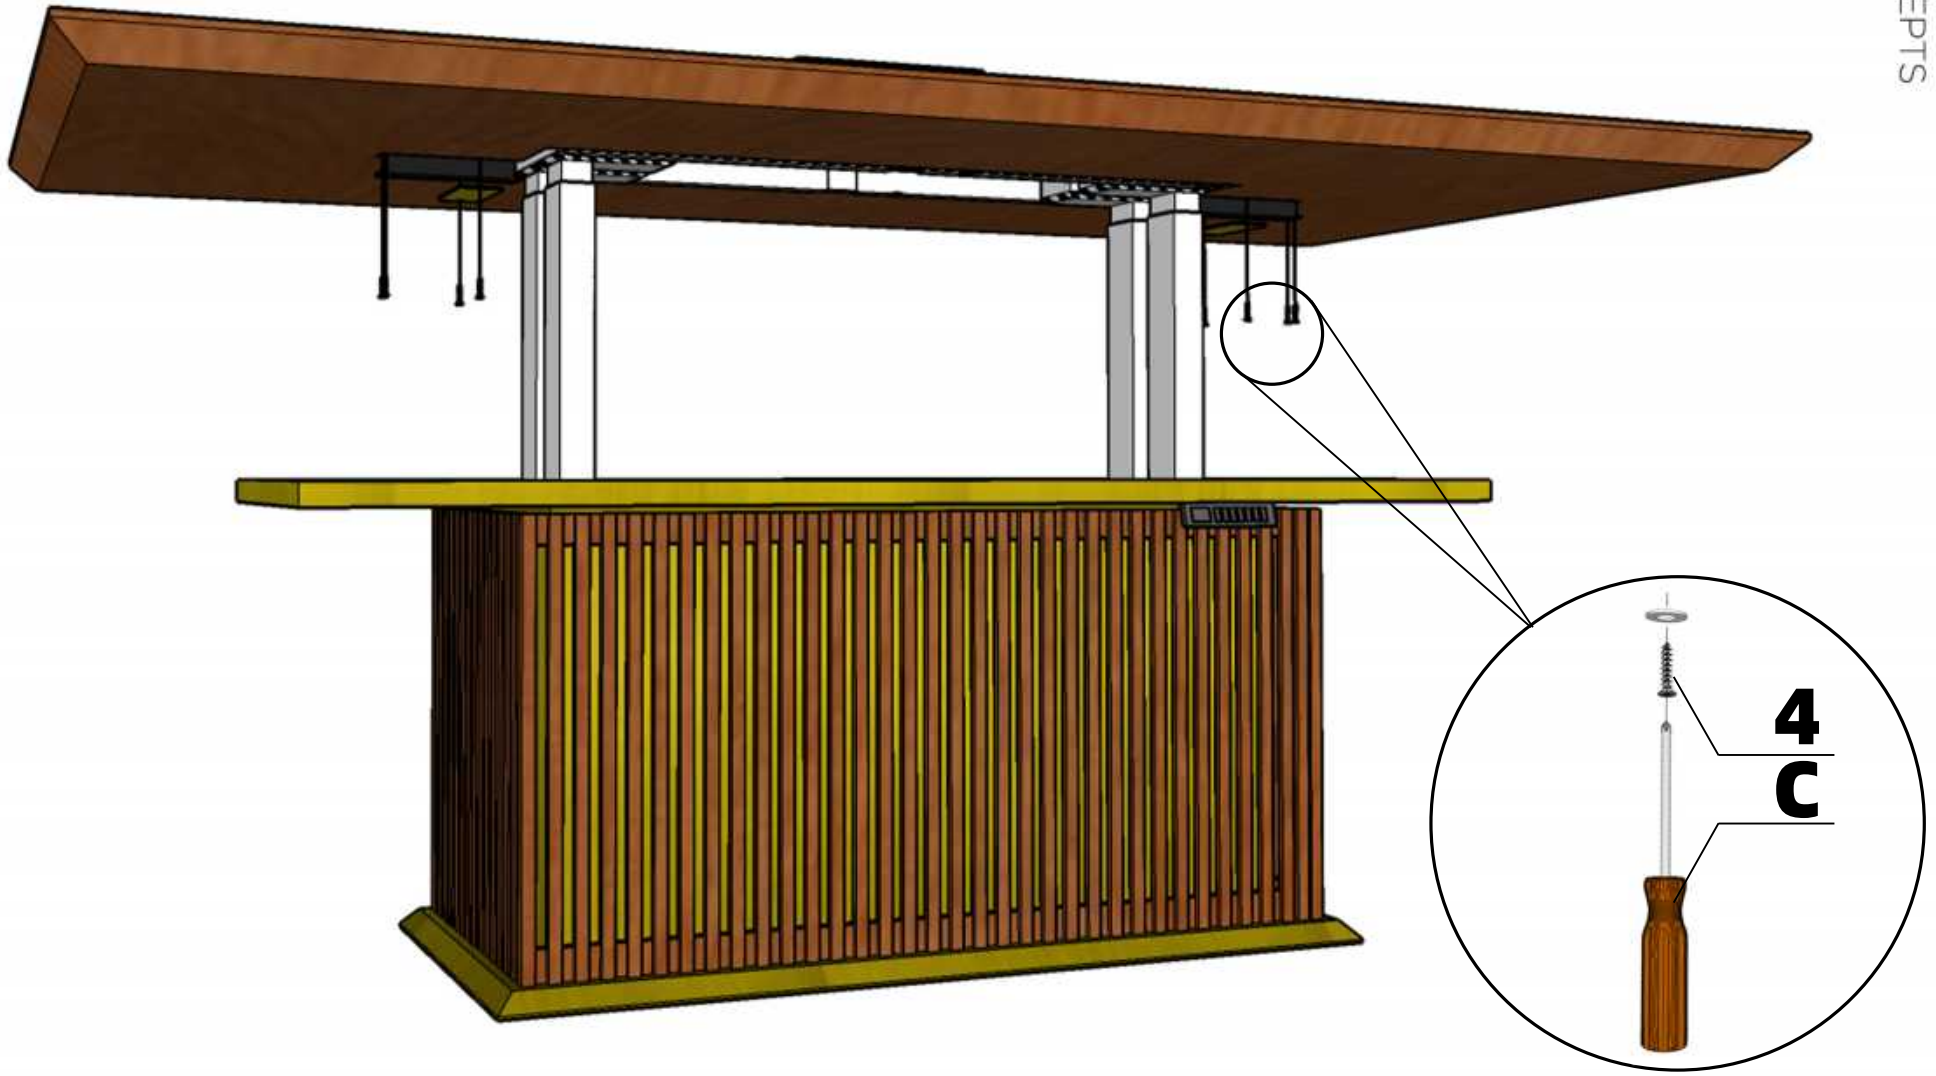

STEP 2

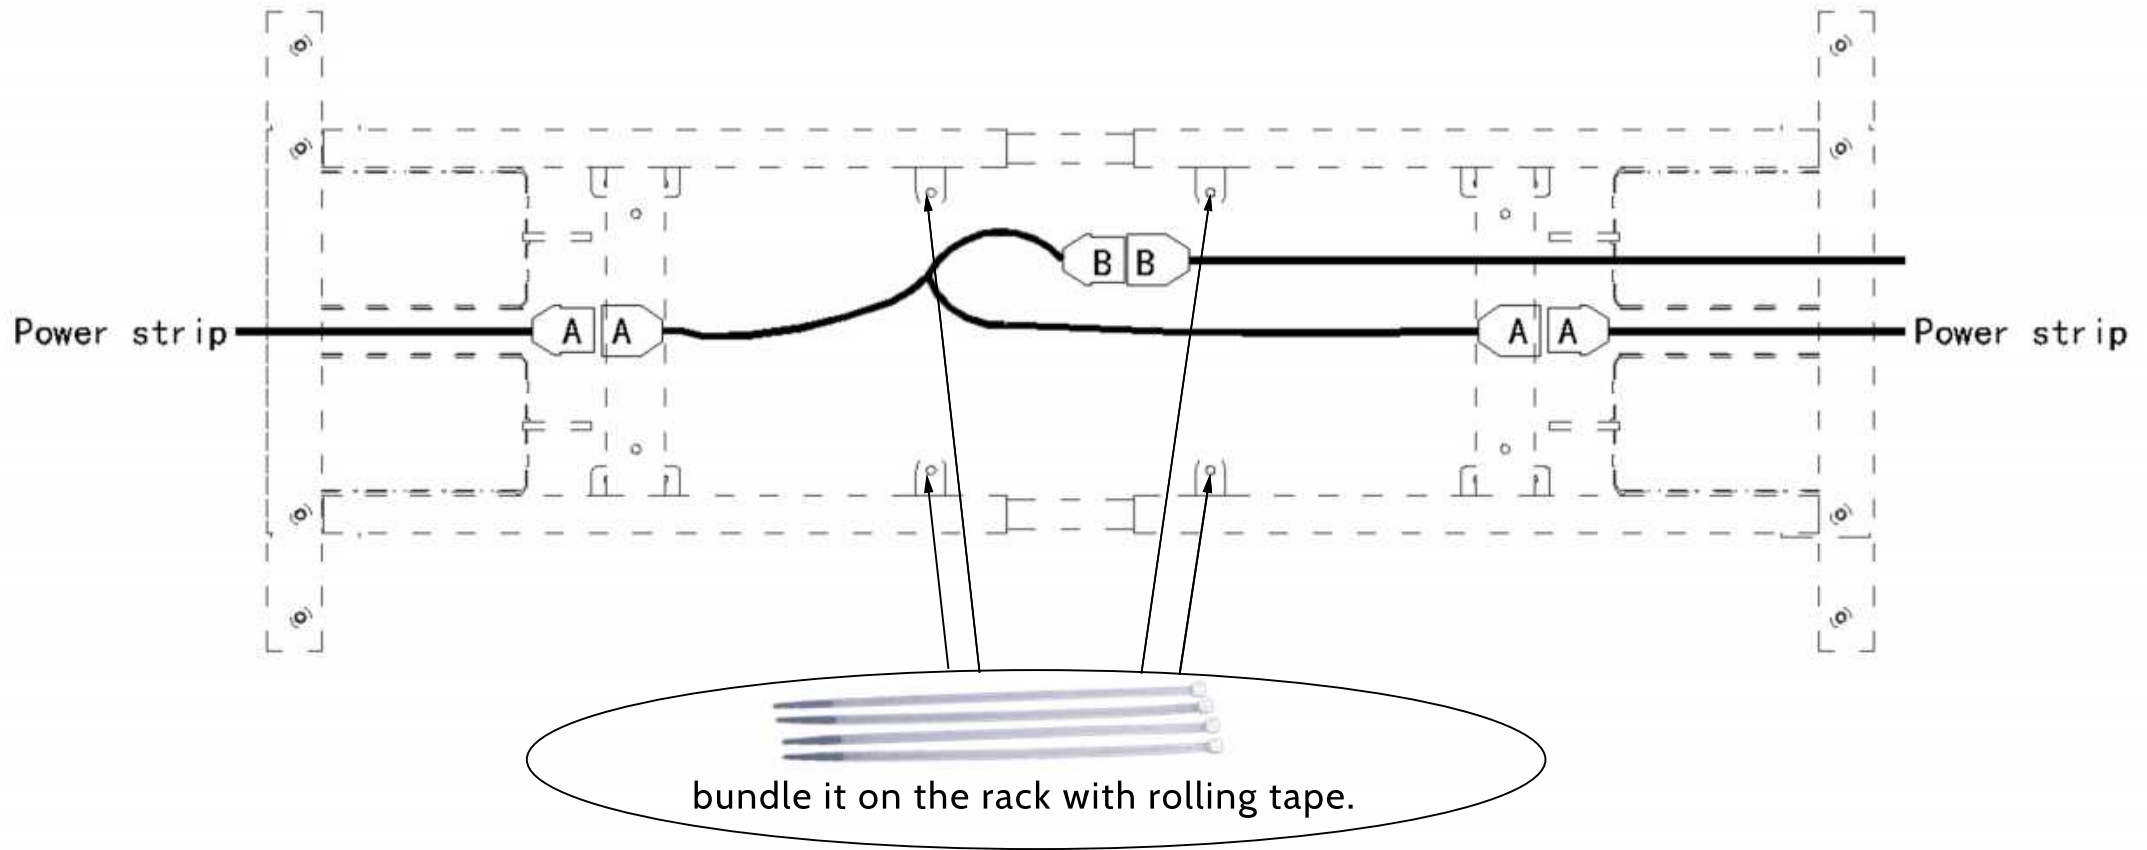

STEP 3

STEP 4

STEP 5

Connect the corresponding wires according to the number.

STEP 6

Press and hold the "↓" key to lower the desktop to its lowest level. Lock the screws.
